A KIT FOR INTRODUCING AN INTRAGASTRIC IMPLANT, A
CARTRIDGE FOR INTRODUCING SUCH AN IMPLANT, AND A
5 CORRESPONDING METHOD OF MANUFACTURE

The invention provides a kit for introducing an
intragastric implant, the kit comprising:

- an intragastric implant for implanting in the
10 stomach, said implant being expandable from a
configuration for introduction into the stomach to a
therapeutic configuration within the stomach; and
- a cartridge (2) for packaging said implant in the
introduction configuration, said cartridge (2) being
15 provided with an opener member (3) activatable by
positive action enabling it to depart from a closed
configuration;

the kit being characterized in that the cartridge
(2) includes locking means (4) functionally connected to
20 the opener member (3) and capable on its own, without any
external action on said locking means (4), of holding the
cartridge (2) in the closed configuration. The invention
is applicable to treating obesity.

(54) Title: KIT FOR THE INSERTION OF AN INTRAGASTRIC IMPLANT; CASE FOR INSERTING SUCH AN IMPLANT,
AND CORRESPONDING PRODUCTION METHOD(54) Titre : KIT D'INTRODUCTION D'UN IMPLANT INTRA-GASTRIQUE, ETUI D'INTRODUCTION D'UN TEL
IMPLANT ET PROCEDE DE FABRICATION CORRESPONDANT

(57) Abstract: The invention relates to a kit for inserting an intragastric implant, comprising an intragastric implant that is to be implanted in the stomach and can be expanded from a configuration used for the insertion thereof into the stomach to a therapeutic configuration inside the stomach, and a case (2) which envelops said implant in the insertion configuration. Said case (2) is provided with an opening member (3) which can be actuated by means of a positive force that allows the case (2) to move from a closed configuration to an open configuration. The invention is characterized in that the case (2) comprises a locking means (4) which is functionally connected to the opening member (3) and allows the case (2) to be immobilized on its own in the closed configuration without applying any external force to said means (4). The invention applies to the treatment of obesity.
